1 Overview

This document describes the [XX] system, which provides [brief description of system functionality]. Prefereable make use of SysML/UML use case diagram.

The rest of this document is organized as follows. In Section 1.1, we reference major prior art capabilities of the system. In Section 1.2, we the intended usage of the system. In Section 1.3, we describe fundamental properties provided by the system. In Section 1.4, we describe de-limitations of capabilities ofn the system. In Section 2, we describe the abstract service functions consumed or produced by the system. In Section 3, we describe the security capabilities of the system.

1.1 Significant Prior Art

Describe significant prior art which provides the foundation for the system - May be omitted for simple services

1.2 How This Service Is Meant to Be Used

Describe intended usage of the system. Usage scenarios shall be described. Preferable a SysML/UML block diagram of the System should be provided. See the SysML profile and library (github.com/eclipse-arrowhead/profile-library-sysml) for support on how such block diagram should look like. Suitable tools are Eclipse Papyrus and MagicDraw.

1.3 System properties

Describe system properties like e.g.:

- Statefull and states preserved, functional and non-functional
- Stateless
- Data store by the system
- Non functional properties
- Power saving properties
- ...

1.4 Important Delimitations

Provide delimitations of the provided system

2 Services

This section describes consumed and produced service. In particular, each subsection names a produced or consumed service indicating the different capabilities and associated interfaces of the service. Referecen to the appropriate SD document shall be made.

3 Security

- If the system can be started in un-secure and/or Arrowhead secure mode.
- Handling of Arrowhead compliant and non-compliant X.509 certificates.
- Implemented security model shall be described, protocol used, data protection used, system authentication capability, produced service authorisation checking, etc.

For Arrowhead certificate profile see github.com/eclipse-arrowhead/documentation
