ARROWHEAD

2   Implementation

2.1   Implementation language and tools

- Used coding language and version

- Used tools, IDE, compiler, linker etc.

- Used libraries and purpose

- Staeful or stateless implementation

2.2   Functional properties implementation

- Resources necessary to perform the function operations

- Data handled and eventually stored by the system

    – Used database

    – Database structure

    – Used ontology

    – Data models

- Result provided as ...

2.3   Non functional properties implementation

Typical non-functional properties implemented are e.g.

2.3.1   Security
2.3.2   Power management
2.3.3   Internal monitoring
2.3.4   Configuration

- Configuration data accepted

- Configuration data formats, se blow.

- ...

For each of the non-functional operations the following details should be documented

- Resources necessary to perform the non-functional operations

- Data handled and eventually stored by the system

    – Used database

    – Database structure

    – Used ontology

    – Data models

- Result provided as ...

3 Services

Reference to the appropriate SysD, SD and IDD documents plus a reference to used library shall be made.

Table 1: References to doumentation for services produced and consumed.

Services produced	SysD ref	SD ref	IDD ref
aaa	SysD XXX	SD aaa	IDD aaa
bbb	SysD XXX	SD bbb	IDD bbb
Services consumed	**SysD ref**	**SD ref**	**IDD ref**
zzz	SysD ZZZ	SD zzz	IDD zzz
yyy	SysD YYY	SD yyy	IDD yyy
